ABOUT US

We design and manufacture lights that enrich spaces with warmth, comfort, and character. Rooted in British heritage, we produce all our designs in Oxfordshire, England. Each Original BTC piece is crafted to last a lifetime, blending artistry with enduring quality.

We believe that beautiful products deserve to be beautifully made. That's why we take pride not only in designing our lights, but in crafting them to the highest standards in our own factories. From concept, design and material selection to meticulous hand-finishing, every stage of production reflects our unwavering commitment to quality.

Our passion spans both contemporary and heritage lighting. Whether developing new designs or preserving those dating back to the late 19th century, we remain dedicated to authenticity, longevity, and timeless appeal.

ALMA FLOOR LIGHT

2025 NEWS

O.BTC × FABIAN FREYTAG

Combining maximalist aesthetics with intriguing contrasts, the Blossom FF Edition brings out a vibrant side of our beloved Blossom portable light. Designed by German designer Fabian Freytag, it showcases a striking monochrome, marble-like hydro-dipped base, highlighted by an iridescent yellow stem and our signature fluted bone-china shade.

MAGNUS

The Magnus range celebrates the fluidity of molten glass with hand-blown opal shades that take on a softly rounded form. A delicate rib detail at the narrower section allows the glass to rest seamlessly within the clean-lined black bronze frame. The collection includes 2, 3, and 4-light linear pendants, along with 4 and 6-shade options in a multi-arm configuration.

CLEAT

The Cleat wall lights captivate with their striking cast bronze body, echoing nautical equipment used to secure ropes aboard ships and harbours. Suitable for installation in bathrooms, the sculptural designs hold a dimmable LED light source. Available in two polished finishes, chrome and bronze, as well as in brushed antique bronze.

AWH

The AWH wall light pairs sleek metalwork with a stepped glass diffuser, which is hand-pressed in our Oxfordshire factory. The IP44-rated fixture is inspired by the striking windows of the Natural History Museum and houses a dimmable LED light source, casting a warm glow. Available in polished brass, chrome, and antique brass.

CHRISTIE PENDANT

ICONS

HECTOR

Simple yet effective, the Hector Dome range was our first collection of lights produced in bone china. A British design icon, its translucent ceramic shade contrasts beautifully with fine metal details and the cotton-braided cable. Created by our founder, Peter Bowles, Hector has become a beloved fixture in homes and projects worldwide.

BLOSSOM LINEAR WALL LIGHT

BLOSSOM

Floral inspiration meets fine lines in the Blossom range. Taking its cues from Plum blossom, the handmade bone china shade balances poetic detail with a sculptural presence. Available as a wall light, portable table light, and pendant, the collection offers versatility. Additionally, both wall lights are suitable for bathrooms.

SHARD

The generously sized Shard Chandelier is ideal for adding drama to living rooms, spacious hallways, and lobbies alike. Designed as a central lighting source, the large version, Shard 100, is made up of 42 handmade, matt bone china tiles surrounding a suspended frosted glass disc. Also available in a smaller version.

EXTRA LARGE HEX PENDANT

QUAD

The Quad pendants effortlessly add an industrial edge to any space, whether above a kitchen island or in a hallway. Handmade in our own metalworks, they are available in small, medium, large, and extra-large sizes, finished in weathered brass or warm olive green with polished brass details.

PILLAR

A strikingly elegant silhouette, the Pillar light's sophisticated Art Deco lines belie its original maritime purpose. Designed in the 1920s as a ship's saloon light, it is available in multiple lengths and widths. Choose from various finishes, including weathered brass and polished chrome.

EXTERIOR BRACKET LIGHT 7680

OUTDOOR

Our outdoor range includes many beloved designs with a unique British heritage, reaching back to London's late 19th century. Crafted with great attention to detail using traditional glassblowing, soldering, and welding techniques, these fixtures illuminate outdoor as well as indoor spaces beautifully and enrich them with character.

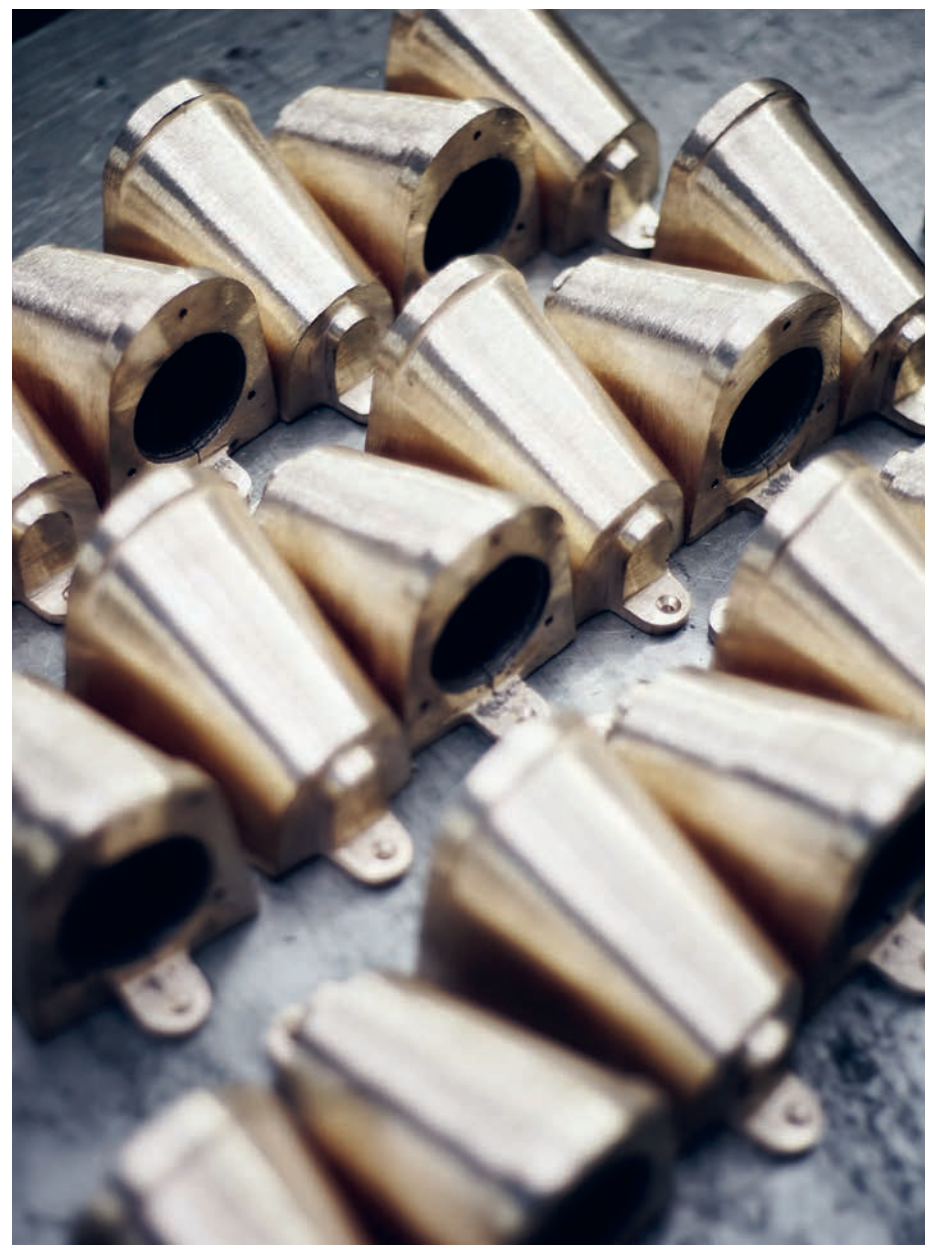

MADE IN ENGLAND

BONE CHINA

Every bone china shade is handmade at our site in Stoke-on-Trent, the historic heart of the British ceramics industry. The pottery is Original BTC's lifeblood, where a team of experts transforms humble clay into sophisticated design pieces. From mixing the slip to multiple firings and applying the last finishing touches, it takes several days to complete one shade.

METAL

We use centuries-old techniques to create truly authentic metal fixtures, some of which originate from the East India Docks in the 1880s. Our Mast lights (pictured above) are sand-cast, a process that involves pouring melted metal into a sand mould. In our factory in Oxfordshire, skilled solderers use traditional techniques to craft each piece with precision.

GLASS

In 2011, English Antique Glass, Britain's last remaining historic flat glass manufacturer, became part of the Original BTC family. Today, our glass factory is located at our main site in Oxfordshire, where skilled craftspeople transform the finest raw materials into shades of exceptional clarity and brilliance using traditional glassblowing methods and finishing tools.

OUR COMMITMENT

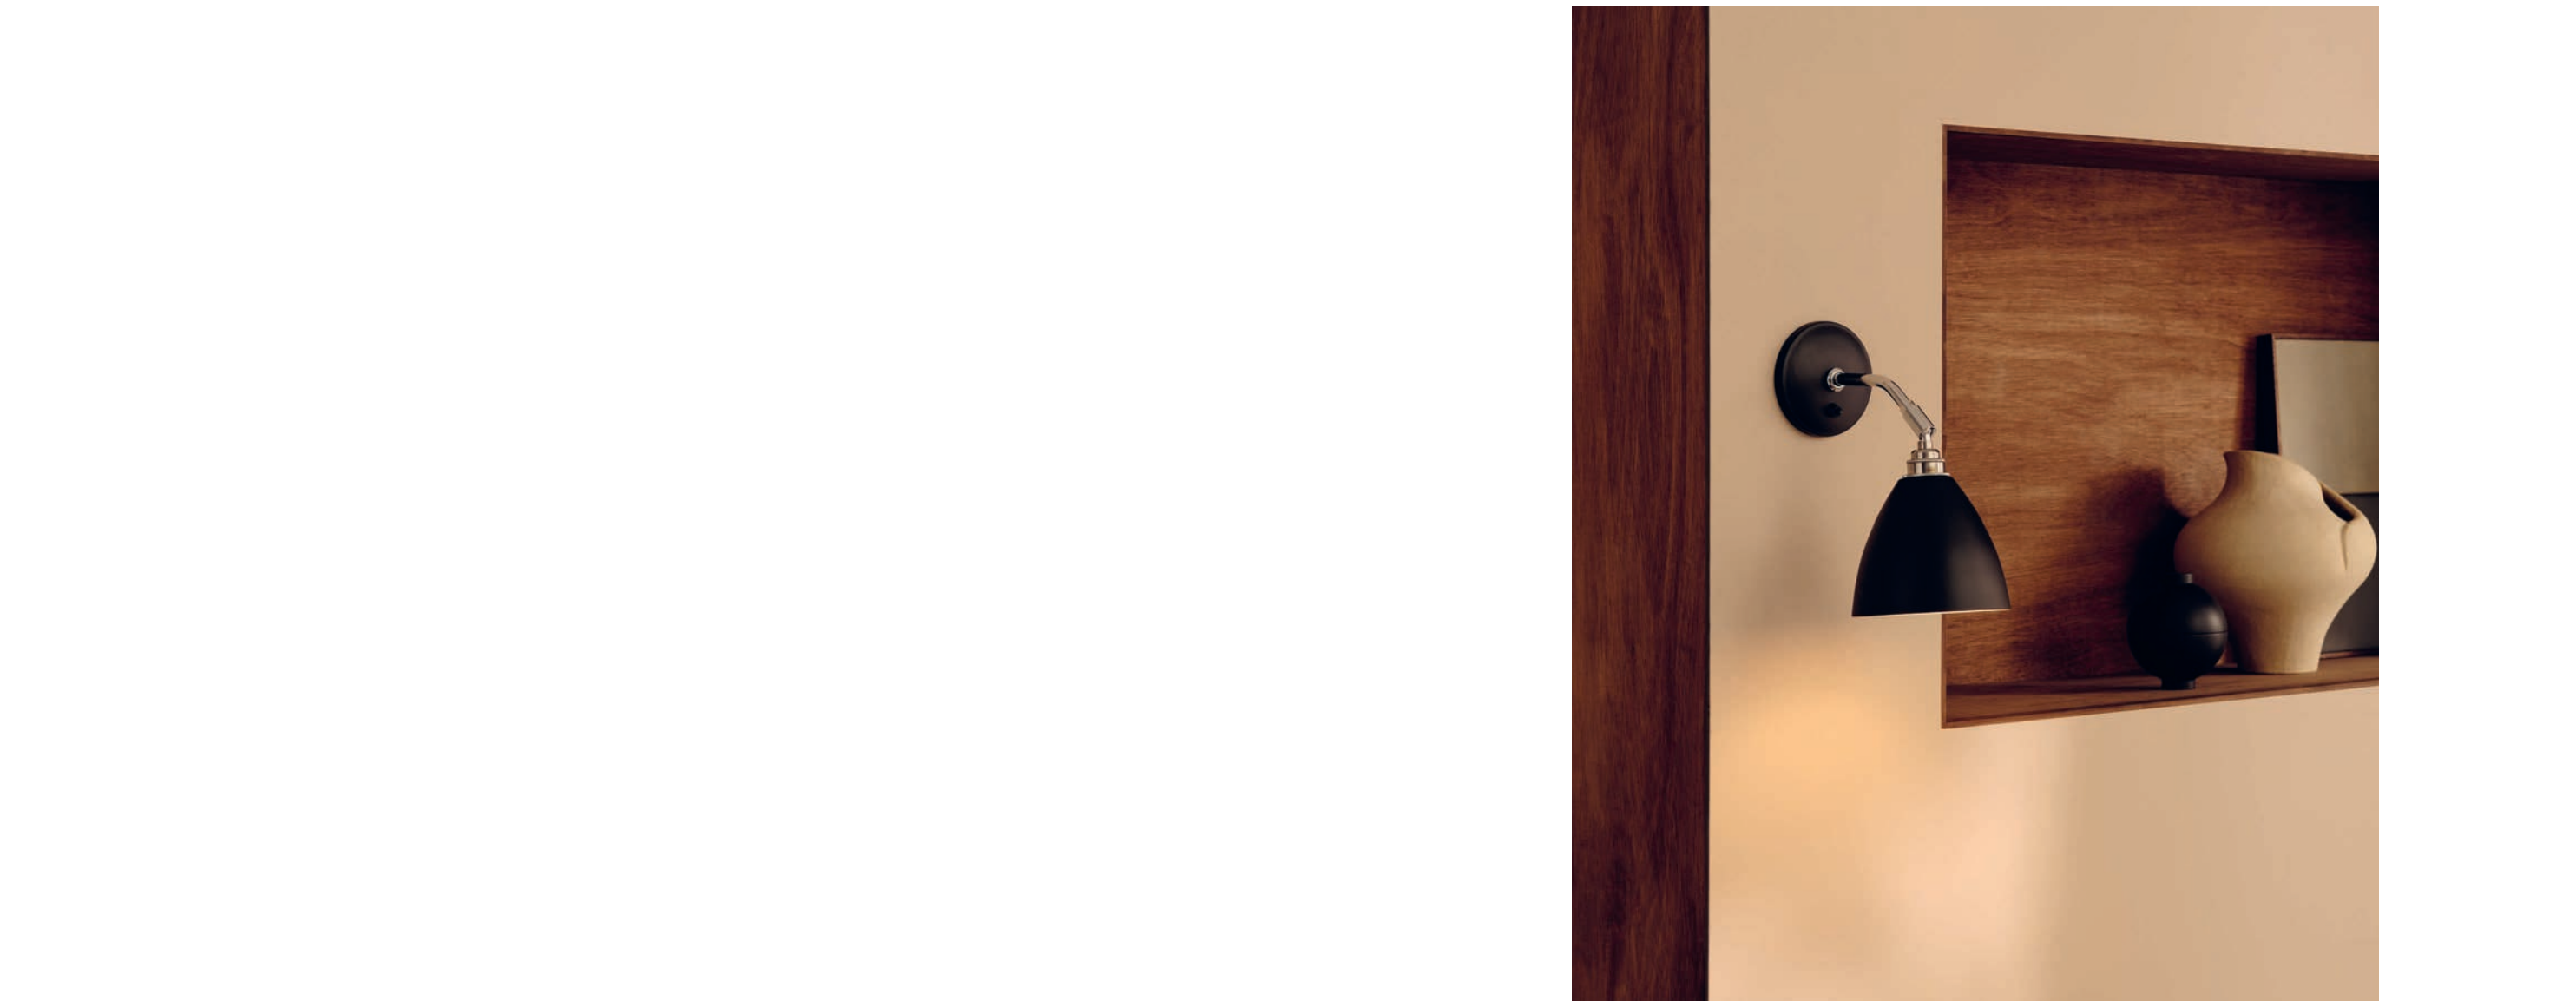

SUSTAINABILITY & COMMUNITY

As a family business, we take responsibility for our impact on our community and the world. That is why we continuously improve our internal processes to design, manufacture and distribute our lights in a responsible manner.

All our products are handmade in England using traditional methods by skilled craftspeople. We offset all the carbon created in our offices, showrooms, and fulfilment facility. Wastage is kept to an absolute minimum, and we recycle directly back to the source.

HECTOR PLEAT WALL LIGHT

TRADE SERVICES

Original BTC lights illuminate restaurants, hotels, and workspaces worldwide. We enjoy collaborating with interior designers, architects, and developers to bring their projects to life. With short lead times and a wide selection of quick-ship items, our team is ready to assist with your lighting specification.

We also offer bespoke services, from tailored adjustments to entirely new designs, working closely with our clients to create unique lighting solutions, subject to quantity and lead times.
